INDUSTRIAL PROJECT EXPERIENCE

Panjin Forging Facility

A 43,602 m² heavy steel factory with lattice columns and overhead cranes rated at 75, 50, 32 and 20 tonnes.

Completed forging facility · aerial photograph

Location	Shouguang, Shandong, China
Building use	Forging production
Building area	43,602 m²
Structure	Heavy steel frame with lattice columns
Eave height	18.95 m
Crane ratings	75 / 50 / 32 / 20 t

INDUSTRIAL PROJECT EXPERIENCE

Photovoltaic Manufacturing Base

A photovoltaic and energy-storage manufacturing development combining factory space with research and office accommodation.

Photovoltaic manufacturing buildings · aerial photograph

Location	Hedong District, Linyi, China
Industry	Photovoltaic modules and energy storage
Development gross floor area	37,634.89 square metres
Factory levels	One storey with local second-level areas
R&D office	Three above-ground levels
Structure	Steel construction with local frame sections

INDUSTRIAL PROJECT EXPERIENCE

Guinea Alumina Fabrication Order

A structural steel fabrication order exceeding 10,000 tonnes for an alumina development in Guinea.

Alumina development · architectural visualisation

Project country	Guinea
Industry	Alumina processing
Scope	Structural steel fabrication
Order quantity	More than 10,000 t
Project reference	Winning Consortium alumina development

INDUSTRIAL PROJECT EXPERIENCE

Xumei Shangnuo OSB Manufacturing Base

Steel structure works for an oriented strand board research and manufacturing base in Linyi, Shandong.

OSB manufacturing base · completed industrial building

Location	Linyi, Shandong, China
Industry	Oriented strand board (OSB) manufacturing
Project owner	Shandong Xumei Shangnuo Decorative Materials
Tiancheng scope	Steel structure works
Overall development area	61,000 m² of total building area

The 61,000 m² area describes the overall development, including production and supporting facilities. It is not a steel fabrication quantity.
